

DATA WITHIN MTSS

Which students need additional support?

Are at least 80% of the students meeting benchmark?

Screening

Identify students who may be at risk and evaluate the effectiveness of core instruction.

Diagnostic

Determine student strengths and skill gaps, as well as factors within the instruction, curriculum, and environment that impact learning.

What skills has the student mastered versus not mastered?

What is the student's rate of improvement?

What factors within the instruction, curriculum, and environment contribute to or inhibit learning?

Progress Monitoring

Measure student responsiveness, quantify a student's growth rate, and evaluate the effectiveness of interventions.

Are we administering assessments as intended?

Fidelity

Measure the extent to which practices and assessment are used as intended.

Are we implementing instruction and interventions as intended?

How is the student responding to the intervention?

What is the overall effectiveness of interventions?
