

DATA WITHIN MTSS

Which students need additional support?

Are at least 80% of the students meeting benchmark?

Screening

Identify students' level of risk and evaluate the effectiveness of core instruction.

Diagnostic

Determine student strengths and skill gaps, as well as factors within the instruction, curriculum, and environment that impact learning.

What skills has the student mastered versus not mastered?

What factors within the instruction, curriculum, and environment contribute to or inhibit learning?

What is the student's rate of improvement?

Progress Monitoring

Measure student responsiveness, quantify a student's growth rate, and evaluate the effectiveness of interventions.

Are we administering assessments as intended?

Fidelity

Measure the extent to which practices and assessment are used as intended.

How is the student responding to the intervention?

Are we implementing instruction and interventions as intended?

What is the overall effectiveness of interventions?
